We all want a nice smelling home, which is why air fresheners are so popular. Many spray and plug-in fragrance products may smell sweet, but breathing in that "fresh scent" also causes you to inhale harmful chemicals such as Phosphates, chlorine bleach, or ammonia

These unnatural substances can cause allergic reactions, trigger asthma attacks, and irritate the lungs.

Spray fresheners don't just disappear into thin air-the chemicals linger on, staying in the home as they land on surfaces and floors and sink into carpets. Suddenly the air doesn't smell quite so sweet..

**Cleanex air freshener** Our all-natural, organic air fresheners are made with nature fill & essential oils. Nature Fill is an all natural product designed to absorb oil & hold scent much longer than most any other product on the market!

Finally, our natural air fresheners that is safe for your family, pets, and the environment.

**Dilution**

Dilute 10ml in 1 liter of soft water in a spray bottle. Spray in the interior areas as your requirement.
